

life.augmented

Simplify your wireless design journey with ST, from MCU selection to RF certification.

Workshop closing

Payoff of the workshop

- Know current **portfolio of ST products** addressing various BLE applications.
- Be familiar with **supportive ecosystem** enabling quick evaluation and developments of final products.
- Have **practical experience with the STM32WBA** product and its related ecosystem.
- Understand how **ST RF application support services** can help with various steps of own BLE (not only) application development.

Final messages

Thanks for joining us today, ST is now your partner for Wireless

- ST has the **right product portfolio** and **wireless ecosystem** to address BLE projects
- ST is here to **support you on your new RF design** from development, to certification up to pre-production
- ST is committed to **wireless**, STM32WBA52 is a first product from a new platform with a complete roadmap to address 2.4GHz market

Stay tune, more to come on ST.com, Wiki and Githubs ...

Workshop Survey

Please let us know your feedback, it is very important for us:
